CHAITANYA GIDIJALA

Java Developer | Spring Boot | Microservices | AI-Native Development | Kafka | REST APIs

+91 7337072766 | chaitugidijala@gmail.com | Hyderabad, Telangana, IN | linkedin.com/in/chaitanya-gidijala | github.com/chaitanya-gidijala | chaitanyatechworld.com

PROFESSIONAL SUMMARY

Java Developer with 2+ years of experience in backend development, building and maintaining Spring Boot Microservices and REST APIs for an enterprise platform supporting GE Aerospace. Experienced in Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, API Performance optimization and automated testing. Skilled in using AI-assisted development tools to accelerate coding, documentation, and test generation while maintaining code quality and security. Passionate about solving engineering problems and building reliable backend systems and developer-focused AI tools.

CORE SKILLS

Languages: Java 17/21

Frameworks: Spring Boot 3.x, Spring MVC, Spring Data JPA, Hibernate ORM, RESTful APIs, Microservices Architecture, JDBC

Messaging & Streaming: Apache Kafka, RabbitMQ, event-driven architecture

Databases: MySQL, SQL query optimization, Redis (caching), JDBC

CI/CD & DevOps: Jenkins CI/CD pipeline design, Docker, Basics on Kubernetes (K8s)

Cloud & Security: AWS (EC2, S3, RDS, Lambda, CloudWatch), JWT, OAuth 2.0, RBAC, HTTPS/TLS, Swagger/OpenAPI 3.0

AI & Dev Tools: GitHub Copilot, agentic AI coding workflows, GenAI-based code review & test generation, JUnit 5, Mockito, Postman, Git/GitHub, IntelliJ IDEA, VS Code, Rally Board

PROFESSIONAL EXPERIENCE

Java Backend Developer | Capgemini **Aug 2024 – Present**

Client: GE Aerospace — enterprise Java/Spring Boot microservices platform, 50,000+ daily transactions across US, UK & India operations

- Developed and maintained 10+ Spring Boot REST APIs supporting aircraft parts tracking and maintenance workflows on an enterprise platform processing 50,000+ daily transactions across US, UK, and India operations.
- Improved API response latency by 50% (800 ms to 400 ms) through SQL query optimization, composite indexing, and database connection-pool tuning.
- Implemented entity mappings and persistence logic using Spring Data JPA and Hibernate, supporting reliable database interactions across backend services.
- Established a centralized exception handling and consistent JSON error responses to improve API reliability and simplify troubleshooting.
- Achieved 85%+ unit and integration test coverage using JUnit 5 and Mockito, including validation and negative test scenarios.
- Worked with Jenkins CI/CD pipelines and automated quality gates to support consistent code validation and release process.
- Applied JWT authentication and role-based access control to protect REST APIs and enforce access restrictions.
- Used GitHub Copilot and AI-assisted development workflows for code scaffolding, code review, and test generation, validating generated changes for correctness and secure coding practices.
- Raised the team's certification pass rate by 85% (measured by pre/post results), by stepping up as COE Team Lead and running daily knowledge-transfer sessions on Docker, Kubernetes and Jenkins for 7 junior developers.

PERSONAL PROJECTS

Chaitanya Tech World | Personal Learning Development Platform **2026 – Present**

AI generated-Prompts Page | Study Roadmap | DSA Visualization

- Developed an interactive **Prompts Page** to organize and explore AI prompts for development and learning workflows.
- Built a **Roadmap** feature to help developers follow structured, step-by-step learning paths for technical topics.
- Developed a **TraceFlow,** an interactive DSA algorithm visualization feature that helps learners understand algorithm execution and problem-solving steps visually.
- Created System Design learning content with visual explanations of architecture, components, data flow, and core system design concepts to simplify complex technical topics.

WebMethods AI Expert (Agent) **2026 – Present**

AI-powered automation tool for webMethods Integration Server development

- Developed an AI-assisted package generation feature to automate webMethods Integration Server package scaffolding and reduce repetitive setup work.
- Built an automated documentation feature to generate technical documentation from webMethods packages and Flow Services.
- Developed an AI-powered error analysis feature to analyze integration logs and identify potential root causes of common failures.
- Implemented an AI-assisted test case generation feature to create functional test scenarios from package and service definitions.

EDUCATION

Master of Computer Applications (MCA)

Andhra University, Visakhapatnam -- CGPA: 8.6

Bachelor of Science, Computer Science

Dr. B.R. Ambedkar University, Sri GCSR College, Rajam -- CGPA: 8.2

CERTIFICATIONS

- Claude Certified Associate (CCAO-F) - Anthropic (2026)
- Claude Certified Developer (CCDV-F) - Anthropic (2026)
- Microsoft GitHub Copilot for Software Engineering Practitioners (2026)
- GitHub Copilot Fundamentals: AI-Paired Programming (2026)
- Java OCEAN Certification Level 1 & Level 2 - Capgemini (2025, 2026)
- Java Full Stack Developer Certification - Frontlines Media Edutech Pvt. Ltd. (2024)
